

Carolina Chickadee

Backyard Bird
Project

All the birds that can use this nesting box:

House and Bewick's Wrens; Black-capped, Mountain, Boreal; Chestnut-backed, and Carolina Chickadees; Junco, Black-crested, Oak, Tufted, and Bridled Titmice; Pygmy, White-breasted, Red-breasted, and Brown-headed Nuthatches; Prothonotary Warblers; and Flying Squirrels

Note: Entrance hole diameter is 1" for House Wrens, Brown-headed Nuthatches, and Pygmy Nuthatches. Use 1 1/8" diameter for all chickadees and Bewick's Wren. Use 1 1/4" diameter for White-breasted Nuthatch, Red-breasted Nuthatch, Prothonotary Warbler, all titmouse species, and Flying Squirrel. Entrance holes 1 1/4" and larger will admit House Sparrows so only use the larger diameter in heavily-wooded areas where there are few House Sparrows.

Two "pivot" nails allow side to swing out for cleaning.

Use a nail or screw at bottom to keep side closed.

Completed Box

Note: these dimensions are for 3/4" thick boards. Some cedar boards are 7/8" thick. If so, the floor must be 3 3/4" wide, not 4".

Lumber: 1" x 6" x 4' untreated, cedar wood.
